DEPARTMENT OF THE ARMY  
U.S. Army Corps of Engineers  
Washington, DC 20314-1000

EM 1110-2-1100  
(Part V)

Manual  
No. 1110-2-1100

31 July 2003

**Engineering and Design  
COASTAL ENGINEERING MANUAL**

**1. Purpose.** The purpose of the *Coastal Engineering Manual* (CEM) is to provide a comprehensive technical coastal engineering document. It includes the basic principles of coastal processes, methods for computing coastal planning and design parameters, and guidance on how to formulate coastal flood studies, shore protection, and navigation projects.

**2. Applicability.** This manual applies to all HQUSACE elements and all USACE commands having Civil Works and military design responsibilities.

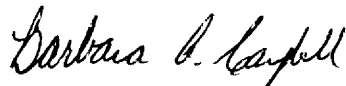

**3. Discussion.** The CEM is divided into six parts in two major subdivisions: science-based and engineering-based. The first four parts of the CEM and an appendix were issued in 30 April 2002 and subsequently updated by change dated 31 July 2003. These included:

- Part I, "Introduction"
- Part II, "Coastal Hydrodynamics"
- Part III, "Coastal Sediment Processes"
- Part IV, "Coastal Geology"
- Appendix A, "Glossary"

The engineering-based subdivision is oriented toward a project-type approach and is divided into two parts. Part V, "Coastal Project Planning and Design," is included in this transmittal. The text and figures provide information on the design process and selection of appropriate types of solution to various coastal problems. Part VI, "Design of Coastal Project Elements," which provides engineering guidance on materials, fundamentals of design, and reliability, is in preparation.

**4. Distribution Statement.** Approved for public release, distribution unlimited.

FOR THE COMMANDER:

  
for MICHAEL J. WALSH  
Colonel, Corps of Engineers  
Chief of Staff
